Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Election/Restrictions

2. Applicant's election without traverse of Group I, claims 1-13 (and now including claims 32, 34-39 and 41-44; claims 33, 40 and 45 fall within the scope of Group III) in the paper submitted on 20 October 2003 is acknowledged.

3. Claims 33, 40 and 45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the paper submitted on 20 October 2003.

Specification

4. The disclosure is objected to because of the following informalities: On page 1, line 14, the first ``A'' should be - - A' - - .

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1732

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 10-13 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Haffner et al (U.S. Patent 5,789,065).

Haffner et al (see the entire document, in particular, col. 1, lines 6-7, 20-24 and 51-63; col. 2, lines 15-38; col. 4, lines 41-58; col. 12, lines 11-46; col. 13, lines 9-24; Examples 1 and 2) teach a process of making a necked nonwoven material as set forth in the instant claims, including decreasing the necking in the two edge regions relative to the central region (by providing either slits in the nonwoven material or guide rolls along the edges of the nonwoven material).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the

Art Unit: 1732

inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 34-39 and 41-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haffner et al (U.S. Patent 5,789,065).

Haffner et al (see the entire document, in particular, col. 1, lines 6-7, 20-24 and 51-63; col. 2, lines 15-38; col. 4, lines 41-58; col. 12, lines 11-46; col. 13, lines 9-24; Examples 1 and 2) teach a process of making a necked nonwoven material as set forth in the instant claims, including decreasing the necking in the two edge regions relative to the central region (by providing either slits in the nonwoven material or guide rolls along the edges of the nonwoven material), except that Haffner do not specifically teach the claimed end result, namely a necked nonwoven material having an average basis weight in the central region within about $\pm 7\%$ (claim 34) or $\pm 3\%$ (claim 41) of an average basis weight in the two edge regions. However, such an end result would have been obvious to, and expected by, one of ordinary skill in the art at the time the invention was made in the process of Haffner et al principally because Haffner et al teaches the same process steps as set forth in the instant claims (note In re O'Farrell, 853 F.2d 894, 7 USPQ2d 1673 (Fed. Cir. 1988)).

Allowable Subject Matter

10. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
